Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: Applicants have claimed a process for the preparation of a non-finished textile component comprising saturating the textile with a bleach solution comprising hydrogen peroxide and a hydrophobic bleaching agent followed by finishing the textile to provide durable press to said textile. The prior art is replete with bleaching compositions for fabrics containing hydrogen peroxide and bleach activator/catalyst/stabilizer. Most of these compositions, however, are found in laundry detergents, and so are for use on finished textiles. Applicants have stated for the record that there is a fundamental difference between finished and unfinished textiles and one would not look to a bleaching laundry detergent to bleach unfinished textiles even though the composition of said laundry detergent appears to be identical to the bleaching composition used in the process of applicants. The examiner cannot say with certainty that a composition for bleaching finished textiles would find the same utility for bleaching unfinished textiles. Accordingly, the present claims are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
